

Remote Pilots Licence (RePL) Certification & Training

REMOTE**AVIATION**
AUSTRALIA

CASA.REOC 1006

FLEXIBLE SOLUTIONS FOR YOUR CAREER NEEDS

Obtaining your Remote Pilots Licence (RePL) is the first step to being able to operate remotely piloted aircraft systems (RPAS), otherwise known as drones or UAVs, for commercial or business purposes without many weight or operating restrictions.

We offer the RePL training needed to become certified as an individual, business or organisation. Anyone can undertake our remote pilot training, regardless of your experience with drones.

We offer training on multiple types of aircraft as well as more advanced RPAS applications.

Our instructors have operated in the aviation industry (manned and unmanned) for years and will give you expert, practical, industry specific advice that will best prepare you for the industry.

The knowledge you gain will ensure you remain safe, legal and efficient in operating remotely piloted aircraft systems.

COURSE CONTENT

- ✔ Aeronautical Knowledge
- ✔ Air Law & Flight Rules
- ✔ RPAS Systems
- ✔ Meteorology
- ✔ Flight Planning
- ✔ Risk Management
- ✔ Human Performance
- ✔ Crew Resource Management
- ✔ Introduction to Aerial Survey & Film

FLEXIBLE STUDY OPTIONS

- ✔ Option to complete theory training in person or online
- ✔ Either 4 days face-to-face training or 2 day face-to-face practical training and 2 days online theory training.

Students will be given access to online training for six months to assist future theory revision.

LOCATIONS

All Capital Cities
Corporate training on location

COURSE COST

\$1995

Course fees include:

- ✔ All theoretical & practical training
- ✔ CASA licence fees
- ✔ Aeronautical Radio Operator Certificate (AROC)
- ✔ English Language Proficiency (ELP) test
- ✔ Student pack (textbook, aeronautical charts & extras)

Note: Price subject to change without notice.

Why train with Aviation Australia?

As a leading remote aviation training provider we deliver:

EXPERT TRAINING

Our instructors are industry leaders with thousands of hours of flying experience operating both manned and unmanned aircraft.

They have operated in accordance with CASA's regulations for years and will give you the expert, yet practical, advice that most other training organisations can't provide. Our training solutions will ensure you have the skills, attitudes and knowledge needed for a successful un-manned aviation career.

FLEXIBLE TRAINING APPROACH

Everyone learns differently! We will adjust our teaching methods to suit the individual as much as possible.

Option to attend full face-to-face training or complete the theory portion online which allows you the flexibility to study however best suits you.

EXCELLENT VALUE TRAINING

Everything you need to become certified and successfully operate RPAS at a competitive price.

Our course fee includes a number of items many other providers charge extra for.

WHAT IS AN AROC?

The Aeronautical Radio Operator Certificate (AROC) is a qualification that removes restrictions for certain operations in controlled airspace and near aerodromes. It provides you with the knowledge to safely communicate with airspace.
